

Task 6: Text and Font

" Describe how to style text and fonts in CSS. Create an example that demonstrates different text properties such as font-family, font-size, font-weight, and text-align. Include a variety of text elements (headings, paragraphs, links) in your HTML and style them accordingly."

- ➔ Styling Text and Fonts in CSS: CSS provides various properties to style text, including font-family, font-size, font-weight, and text-align.
- font-family: Defines the font used for text.
 - font-size: Sets the size of the text.
 - font-weight: Specifies the thickness (boldness) of the text.
 - text-align: Aligns text horizontally.
