

## Task 7: Online Fonts and Favicon

**" What are online fonts, and how can they be integrated into a website? Explain how to use Google Fonts in an HTML document. Additionally, describe what a favicon is and how to add one to a web page. Provide examples of the HTML code needed to implement both features."**

- ➔ Online Fonts: are fonts hosted on the web and can be embedded into websites using services like Google Fonts. These fonts allow developers to apply a wide variety of styles without relying on system-installed fonts.
- ➔ How to Use Google Fonts in HTML:
  - Go to Google Fonts.
  - Select a font (e.g., Roboto).
  - Copy the <link> tag provided by Google and paste it in your HTML.
- ➔ A favicon is a small icon displayed in the browser tab next to the page title, helping users to identify the website.
