

Task 10: Box Model

" Define the CSS box model and its components (content, padding, border, margin). Create an example HTML layout and style it uses the box model. Provide visual examples showing how changing padding, margin, and border affects the layout and spacing of elements."

➔ CSS Box Model: The CSS box model consists of the following components:

- Content: The actual content of the element.
- Padding: Space between the content and the border.
- Border: Surrounds the padding and content.
- Margin: Space outside the border.
